

High Five Target System Summary

The High Five Target System is a unique, automated interactive target system designed and developed to be deployed on a driving range to expand the entertainment value and practice options available to all range visitors and the revenue opportunity for range owner/operators.

This document describes the capabilities that are included with the High Five Target System.

The High Five Target System can be installed and retrofitted to any existing driving range without the need for additional real estate or other capital investment. The System includes the product hardware and software, installation and operation manuals, and 90-day “Worry Free” Warranty. Everything needed to get the system running within 1 day is included. Optional configurations and Extended Warranty are also available.

The High Five Target System is also fully upgradeable to the Scramble Game System, protecting the range owner/operator’s original investment if they choose to upgrade at a later point in time. A comparison of the features, advantages and benefits of each system is available on the Range-Play website at www.range-play.com.

Product Description

The High Five Target System includes the following Product components: one or more Range Targets, a System Controller including software, and an Audio System. The Range Targets are deployed on the range in the landing area, and can be arranged in a variety of configurations. As players strike the Range Targets, feedback is automatically provided both visually and acoustically as the ball strikes and rebounds off the target, and audibly thru the System Controller and Audio System. The System Controller is programmed with a variety of audio feedback “clips” and additional customized audio can be added by the range operator. The System Controller provides three (3) modes of operation, including simple “games” which can be fun and exciting for range participants to play during the normal course of operation or during events which the range operator may run.

The High Five Target System is available in standard and custom configurations depending on the size and needs of the driving range. The recommended Base Configuration of the High Five Target System, which supports all operating modes and features of the System, includes the following hardware components:

- Set of 3 Range Targets
 - 2 x Series 100 targets (4’x6’)
 - 1 x Series 150 targets (8’x12’)
 - Each target is color- and numeric-coded, and accepts a banner or “target skin” which can display graphics, logos, or other messages or advertising. See *Target Skins* and *National Marketing/Sponsorship Service* under Options and Upgrades section.
- Strike Detector electronic subsystem for each Target, plus 1 spare (total 4 subsystems). Each subsystem is wireless, completely self-contained, weather-/water-proof, and battery operated, so that no wires are necessary on the range.

Hardware components (continued):

- System Controller, including High Five Target System Software and related controller accessories.
- Audio System, including amplifier and 1 indoor/outdoor speakers, 50 feet of speaker wire, and mounts.

Reduced and expanded configurations are available.

The High Five Target System Controller and Software contains all the functionality to run the system in an automated fashion. The Software includes three (3) pre-programmed modes of operation:

- Idle Mode – feedback provided when the Range Targets are struck;
- Prompted Mode – the System entices the participants on the range with audible prompts to hit the targets and to hit them again once they have been hit;
- Progresso™ Mode – a simple game where the System prompts the participants on the range to hit the Range Targets in a specified order with some time constraints adding a element of urgency to the “game.”

The Software also controls the communication with the Strike Detector subsystem and to the Audio System, and does not require any intervention by range personnel aside from selecting the desired mode of operation.

A Documentation Set is also provided and includes the: *Installation, Setup and Service Guide* and *Operations Guide*.

Installation

The High Five Target System is designed and packaged to be fully installable by range personnel, and installation and setup will take about 6-8 hours. As part of the included Support plan, telephone support is provided to answer any questions during installation and the warranty period.

An optional Installation Service is available.

“Worry-Free” Warranty

The High Five Target System includes a 90-day full “Worry Free” Warranty. The “Worry Free” Warranty provides a full-replacement warranty on all High Five Target System hardware components against any failure due to design or manufacturing flaws, electronics component failure. Certain failures, such as forces of nature, are not covered. Bottom-line, the “Worry Free” Warranty provides you the peace-of-mind that the High Five Target System will be up and running at all times.

Extended Warranty terms are available as well.

Support

Unlimited telephone technical support is provided at no charge during the warranty period.

Sale and Licensing Terms

The High Five Target System and related products and services are available for sale under the R-PEC Range License Agreement. Contact Range-Play sales or representative for details.

Options and Upgrades

The following Options and Upgrades are available for the High Five Target System:

- **Target Skins** – optional banners for Range Targets. Standard and custom available.
- **Installation Service Option** – for a fixed fee, Range-Play will provide on-site installation services.
- **Extended Warranty Option** – provides a 1-year extension to the “Worry Free” Warranty
- **Extended Support Option** – provides a 1-year extension for telephone technical support
- **Software Update Service Option** – provides all available updates to the High Five Target System software for 1-year.
- **Upgrade to Scramble Game System** – the High Five Target System is fully upgradeable to the Scramble Game System. This upgrade provides all the hardware and software component upgrades to convert the High Five Target System to the Scramble Game System.
- **Webpage Development and Listing Service** – Range-Play will develop, host and maintain a webpage for the range providing a site to post event and league schedules, promotional offerings (coupons, etc), and other information about the System at the range.
- **National Marketing/Sponsorship Service** – Range-Play secures regional and national advertising sponsorships for the Range Target faces, including merchandise and promotions (discounts, coupons, etc) which can be offered as prizes at the range. Range-Play provides a revenue share of the advertising revenues from the targets on the range as part of this service.
