

Scramble Game System Summary

The Scramble Game System is a unique, fully automated golf game system designed and developed to be deployed on a driving range to expand the entertainment value and practice options available to all range visitors and the revenue opportunity for range owner/operators.

This document describes the products and services that are included with the Scramble System.

The Scramble System is available as a turn-key solution which can be installed and retrofitted to any existing driving range without the need for additional real estate or other capital investment. The turn-key solution includes the Product hardware and software, installation and training Startup Services, and full “Worry Free” Warranty. The combination of these products and services provides everything needed to get the system running within days.

For more information about the games that can be *played* see the product sheet “*Playing the Range,*” and for a description of the ROI potential and modes of operation on the range see the product whitepaper “*ROI for the Range-Play Scramble System: How ‘Changing Your Range’ Will Affect Your Bottom Line!*”

Product Description

The Scramble System includes the following major Product components: a series of Range Targets, a Game Computer System, and a Scoreboard. The Range Targets are deployed on the range in the landing area, in groups or “fairways” so that the range can be segmented for team-on-team competitive play for specific Games. As players strike the Range Targets, feedback is automatically provided both visually thru the scoreboard and audibly thru the Game Computer System. The Game Computer System is programmed with a variety of fun and exciting group and team oriented Game Programs, but the games are easily played by individuals and/or one-on-one partners as well.

The Scramble System is available in standard and custom configurations depending on the size and needs of the driving range. The Base Configuration of the Scramble System includes the following hardware components:

- Set of 6 Range Targets
 - 2 x Series 100 targets (4’x6’)
 - 2 x Series 150 targets (8’x12’)
 - 2 x Series 200 targets (8’x18’)
 - Each target is color- and numeric-coded, and accepts a banner or “target skin” which can display graphics, logos, or other messages or advertising. See *Target Skins* and *National Marketing/Sponsorship Service* under Options and Upgrades section.
- Strike Detector electronic subsystem for each Target, plus 1 spare (total 7 subsystems). Each subsystem is completely self-contained, weather-/water-proof, and battery operated, so that no wires are necessary on the range.
- Game Computer System, including Scramble System Software and related hardware accessories. The audio output can be directed to any standard audio receiver/speaker system. An optional audio system is available from Range-Play.

Hardware components (continued):

- Series 60 Scoreboard, including six (6) digital counters, timing clock, LED banner line display. (110/120VAC required)

Expanded and custom configurations are available.

The Scramble System Software contains all the functionality to run the system in an automated fashion. The Software includes a wide variety of pre-programmed Game Programs. The Software also controls the communication from the Strike Detector subsystem and to the Scoreboard, and does not require any intervention by range personnel aside from scheduling the desired Game Programs at desired times.

A Documentation Set is also provided and includes the: *Installation, Setup and Service Guide* and *Operations Guide*.

Purchase and installation of the Scoreboard mounting posts are not included, but these services are available upon request.

Startup Services Description

With the purchase of the Scramble System, the following Services are included. These Services ensure out-of-the-box turn-key operation on the range after installation, and provides initial marketing and business consulting support to ramp the range business model to generate new revenue within the first month.

- 1) Installation – complete assembly, setup, and operational startup of Scramble System (2 Days)
- 2) Product Training – conduct a operational training class for range personnel (1 Day)

“Worry-Free” Warranty

The Scramble System includes a one (1) year full “Worry Free” Warranty. Extended warranty terms are available as well. The annual “Worry Free” Warranty provides a full-replacement warranty on all Scramble System hardware components against any failure due to design or manufacturing flaws, electronics component failure, or incorrect installation by Range-Play. Certain failures, such as forces of nature, are not covered. Bottom-line, the “Worry Free” Warranty provides you the peace-of-mind that the Scramble System will be up and running at all times.

Support and System Update/Upgrade Service

The Scramble System includes one (1) year of unlimited telephone technical support, and one (1) year of the System Update/Upgrade Service. The Update/Upgrade Service provides all available updates and upgrades to the Scramble System hardware and software at no additional cost. Software Upgrades include new standard Game Programs, audio and graphic plug-ins for the Scramble System, and other software improvements. Extended support terms are available.

Sale and Licensing Terms

The Scramble System and related products and services are available for sale under the R-PEC Range License Agreement. Contact Range-Play sales or representative for details.

Options and Upgrades

The following Options and Upgrades are available for the High Five Target System:

- **Annual “Change the Range” Program** – marketing program to help maximize range revenue utilizing Scramble Game System
- **Target Skins** – optional banners for Range Targets. Standard and custom available.
- **Deployment Consultation** – an optional but recommended Startup Service. Prior to system purchase, Range-play will review your range layout, customer base and revenue model, and provide a written recommendation of the optimal system configuration and services package for your facility.
- **Extended Warranty Option** – provides a 1-year extension to the “Worry Free” Warranty
- **Extended Support Option** – provides a 1-year extension for telephone technical support
- **Software Update/Upgrade Service Option** – provides all available updates and upgrades to the High Five Target System hardware and software for 1-year.
